PROFILE

I turn business operations into usable systems.

I build practical software that turns fragmented operations into structured workflows, dashboards, automations and internal tools. My edge is combining international business, day-to-day operations and hands-on product building inside real businesses.

CAPABILITIES

AI Workflows

Automation design, LLM-ready processes, prompt design

Full-Stack Products

React, TypeScript, JavaScript, Vite, APIs

Business Systems

POS, inventory, payroll, finance, CRM, dashboards

Serverless Tools

Netlify Functions, Netlify Blobs, lightweight data stores

Operations Analysis

Workflow mapping, reports, exceptions, follow-up

Product Thinking

Real business needs translated into usable tools

EDUCATION

Seattle University
